

Energy and Resource Management Policy

Bywaters' vision is to lead the UK to a sustainable future

Bywaters is more than a recycling company. We're committed to inspiring change to create a more sustainable world, and energy and resource management is a fundamental part of our operations. Sustainability lies at the heart of what we do and we are committed to ensuring that our operations are resource efficient. Further to that, we aim to be the industry's flagship for sustainability by inspiring others to follow our lead and transform their operational practices to create a better world for future generations.

This Energy and Resource Management Policy aims to ensure the efficient use of energy and resources across our business.

In implementing this policy we shall:

- Comply with energy legislation and obligations relating to energy consumption, use and efficiency;
- Encourage the development of energy-efficient solutions, while continually exploring new technologies;
- Set improvement plans supported by objectives and targets for improving energy efficiency, as part of the management system's continual improvement;
- Make available adequate resources to achieve our energy objectives and targets;
- Provide awareness training on the efficient use of energy to selected supervisors and managers;
- Communicate this policy to our suppliers to support the procurement of energy-efficient products and services;
- Support the procurement of energy efficient products and services;
- Support design activities that consider energy performance.

This Energy and Resources Management Policy shall be communicated and placed permanently on display for all staff via our site and office notice boards and our intranet.

This policy will be reviewed every 24 months or whenever significant changes are made to legislation or in any of the company's activities which have direct impact on the policy.

Date issued: 01/06/19

John S. Glover, Managing Director
